Computer Requirements
The minimum hardware requirements for broadband wireless service are listed below. If you need help in determining whether your computer meets the minimum requirements, you can perform an automated check. By clicking below, a small application will download to your computer, perform the analysis and remove itself upon your shut down or restart of Windows. The download usually takes 2.5 minutes on a 28.8K modem.
Click to Check Computer Requirements
Listed below are the minimum hardware requirements to operate broadband wireless service.
Windows Machines
Pentium class 133Mhz CPU (or greater)
32 MB of RAM
65 MB of free hard disk space
One available ISA or PCI slot or Ethernet connection
Windows 95 Operating system or higher
CD ROM drive
Original Operating System Software and Utilities disk or CD-Rom
Macintosh Machines
PowerMac or higher
32 MB of RAM
10BaseT Ethernet connection
65 MB of free hard disk space
Mac OS 7.6.1 or greater
CD ROM drive
600
